

Portland General Electric Company

October 31, 1980

Docket 50-344  
License NPF-1  
License Change Application 69

Director of Nuclear Reactor Regulation  
ATTN: Mr. Robert A. Clark, Chief  
Operating Reactors Branch No. 3  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Sir:

Attached are three signed originals and 40 conformed copies of License Change Application 69 requesting amendment of Operating License NPF-1. This License Change Application has been evaluated to be a Class III amendment request and a check for \$4,000 is attached in accordance with 10 CFR 170.

PGE has transmitted a copy of this request to the Oregon Department of Energy for their consultation.

Also attached is one signed copy of a Certificate of Service for License Change Application 69 to the chief executive of the county in which the facility is located and the Director of the State of Oregon, Department of Energy.

This License Change Application is based on the NRC model Technical Specifications transmitted by the NRC letter of July 2, 1980 to all pressurized water reactor licensees. Please note that this License Change Application does not include the model Technical Specification Changes regarding Sections 3/4.3.2, "Engineered Safety Feature Actuation System Instrumentation"; 3/4.6.4, "Containment Isolation Valves"; and 3/4.7.1.2, "Auxiliary Feedwater System", since Technical Specifications for these items either already exist in the current Trojan Nuclear Plant Technical Specifications or are under NRC review (LCA 57).

Page Two

The NRC letter of July 2, 1980 also requested a license amendment to add conditions related to a System Integrity Measurements Program and Improved Iodine Measurements Capability. These license conditions are not included in this LCA, since these programs have already been prepared at the Trojan Nuclear Plant and NRC approval on their adequacy has been provided in the safety evaluation by the NRC Staff (NRC letter of April 23, 1980). It is thus redundant and unnecessary to add a separate and special license condition for these items.

Sincerely,

Bart D. Withers  
Vice President  
Nuclear
