WASHINGTON, D. C. 20555

Docket No. 50-395

OCT 17 1980

APPLICANT: South Carolina Electric & Gas Company
FACILITY: Virgil C. Summer Nuclear Station, Unit 1
SUBJECT: SUMMARY OF OCTOBER 9, 1980 MEETING REGARDING PRESERVICE
INSPECTION PROGRAM

1. General

On October 9, 1980, the staff met with representatives of the applicant to discuss their preservice inspection program for Virgil C. Summer Nuclear Station, Unit 1.

2. Purpose

The purpose of the meeting was to review the staff concerns regarding the applicant's preservice inspection plan submitted by letter dated September 17, 1980.

3. Discussion

The principal concern with the applicant's submittal resulted from the applicant combining both the preservice inspection plan and the inservice inspection plan in a single document. The applicant, prior to the meeting proposed a single document with the preservice inspection plan. This document which was left with the staff will be submitted on the docket in the near future.

The staff also expressed a concern that the applicant had identified all relief requests. We discussed some of the candidate areas based on experience from the review of similar facilities.

The following schedule for future events was agreed to at the meeting:

- October 24, 1980 - Staff comments to applicant on revised submittal.
- November 14, 1980 - Applicant submits revised plan including all relief requests.

OCT 17 1980

December 15, 1980 - Staff requests for additional information
on revised plan.

January 15, 1980 - Applicant responses.
