Mr. James R. Shea
Director of International Programs
United States Nuclear Regulatory Commission
Room 6714 - MNBB
Bethesda, Maryland

Dear Mr. Shea:

I refer to the letter from your office dated August 19, 1980, requesting Executive Branch views as to whether issuance of an export license in accordance with the application hereinafter described would be inimical to the common defense and security of the United States and whether the proposed export meets the applicable criteria in the Atomic Energy Act as amended by the Nuclear Non-Proliferation Act of 1978:

NRC No. XCOM0430 -- Application by General Atomic Company for authorization to export to Indonesia \$200,000 worth of replacement parts such as control rod elements and drives, fission and ion chambers, electronic equipment, etc. for use in the Bandung TRIGA II and Kartini research reactors.

It is the judgment of the Executive Branch that the export contemplated will not be inimical to the common defense and security of the United States, and that this export is consistent with the provisions of the Atomic Energy Act of 1954, as amended by the Nuclear Non-Proliferation Act of 1978.

As an NPT party, Indonesia has committed itself to maintaining IAEA safeguards on all of its peaceful nuclear activities and has pledged not to produce or otherwise acquire any nuclear explosive device. It is therefore the judgment of the Executive Branch that Criteria (1) and (2) for exports of reactor components under Section 109 of the Atomic Energy Act, as amended are met. The remaining criterion, agreement not to retransfer any U.S.-supplied component without prior U.S. consent, has been satisfied by the receipt of an assurance letter, from the Embassy of Indonesia, a copy of which is enclosed.
