Inspection Summary

Areas Inspected: Routine, unannounced inspection of the approved security plan and its implementation relative to the protection of SNM; security organization; access control; alarm systems; keys, locks and hardware; communications; surveillance; procedures; security program review; and protection against radiological sabotage. The inspection involved eight inspection-hours onsite by one NRC inspector and was begun during non-regular hours.

Results: The licensee was found to be in compliance with NRC requirements in all eleven areas examined during the inspection. A previous item of noncompliance was reviewed and closed.
