Gentlemen:

This refers to your request dated December 6, 1961 and the Supplement thereto dated February 9, 1962 for authorization to make Proposed Change No. 11 in your facility pursuant to paragraph 3.A. of License No. DPR-3, as amended.

We have reviewed the proposed change and have found that the installation of up to twelve special tube assemblies containing encapsulated specimens of reactor vessel material does not present significant hazards considerations not described or implicit in the license application as amended to June 23, 1961, and that there is reasonable assurance that the health and safety of the public will not be endangered by operation of the facility as proposed. A copy of our related hazards analysis is enclosed.

In view of the foregoing, Yankee Atomic Electric Company is hereby authorized under License No. DPR-3 to install up to twelve special tube assemblies containing encapsulated specimens of reactor vessel material in accordance with Yankee's request entitled Proposed Change No. 11 dated December 6, 1961 and the supplement thereto dated February 9, 1962.

Sincerely yours,

Director
 Division of Licensing and Regulation
