Suppl.

JUN 6 1961

Change No. 3

Docket No. 50-29

Change No. 3

Yankee Atomic Electric Company
441 Stuart Street
Boston 16, Massachusetts

Attention: Mr. Roger J. Coe
President

Gentlemen:

This refers to your request dated February 21, 1961 and supplement thereto dated May 22, 1961 for AEC authorization to make Proposed Change No. 3 in your facility pursuant to paragraph 3.A. of License No. DPR-3, as amended.

We have reviewed the proposed modification of the facility and have found that installation of a vent system from the distillate accumulator tank in the radioactive waste disposal system as described does not present significant hazards considerations not described or implicit in the license application as amended to January 12, 1961, and there is reasonable assurance that the health and safety of the public will not be endangered by operation of the facility as proposed. A copy of our analysis of the operation of the facility with the modification described is attached hereto.

In view of the foregoing, authorization is hereby granted to Yankee Atomic Electric Company to install a vent system from the distillate accumulator tank in the radioactive waste disposal system in accordance with Yankee's Proposed Change No. 3, dated February 21, 1961 and supplement thereto dated May 22, 1961.
