0 2 | No. 80-23: Following a plant trip, the "B" main feedwater regulating

1 0 | The cause was a manual vent throttle valve that did not allow enough air
1 1 | to vent. Either the valve was mispositioned, drifted closed or foreign
1 2 | material blocked the air passage in the valve. The throttle valve was
1 3 | reset. Permanent long-term corrective action is under investigation.
