

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

OCT 17 1980

MEMORANDUM FOR: John T. Larkins, Chief  
Program Coordination Branch  
Administration and Resource Control Staff  
Office of Nuclear Reactor Research

FROM: George W. Knighton, Chief  
Research and Standards Coordination Branch  
Division of Safety Technology  
Office of Nuclear Reactor Regulation

SUBJECT: RESEARCH RESULTS UTILIZATION FORM

I am forwarding herewith the Research Results Utilization Form  
for RIL No. 91, "ACPR Experiments on Prompt-Burst  
Energetics with Fresh Uranium Carbide Fuel."

George W. Knighton, Chief  
Research and Standards Coordination Branch  
Division of Safety Technology

OFFICIAL PROGRAM OFFICE CONSENSUS ON UTILIZATION OR VALUE OF BIL TO THE REGULATORY PROCESS

BIL # 91 DATE ISSUED: 6/3/80 REG: ACPR Accident Energetic REG. CHAIRPERSON: R. W. Wright

BIL TITLE: ACPR Experiments on Prompt-Burst Energetics with Fresh Uranium Carbide Fuel

PROGRAM OFFICE: RES CONTACT NAME: R. W. Wright DATE: 8/21/80

DESCRIBE APPLICATION TO REGULATORY PROCESS:

The program was initiated when the licensing of a liquid metal fast breeder reactor (LMFBR) appeared imminent. The experiments have confirmed a hypothesis that molten-fuel-coolant interactions would be most likely and more energetic with carbide fuel than with oxide fuel. This work therefore provides a helpful data point should the NRC again actively consider licensing of an LMFBR.

DESCRIBE IMPACT OF RESULTS:

The <sup>research</sup> hypothesis appears to have verified a long standing concern. No further research is expected in the absence of a positive LMFBR program, especially a carbide fueled LMFBR. The data and results will be expected to be considered during the safety review of the FFTF program by NRR.

*closed-loop subassembly*

COMMENTS/REMARKS:

Beyond the basic conclusion that carbide fuels yield greater energetics in core-melt accidents, care is recommended to avoid reading too much into the results of these limited experiments. *The research results do not need to be considered for Board notification.*
