DOCKET NO. 50-267

Public Service Company
of Colorado
ATTN: Mr. C. K. Millen
Senior Vice President
P.O. Box 340
Denver, Colorado 80201

Gentlemen:

We are in the process of auditing reactor facility cases to determine what fees are due pursuant to 10 CFR 170.22 for applications for license amendments and other approvals for specific plants such as the Fort St. Vrain facility (License No. DPR-34). In this connection, we find that your Company has filed a number of applications for your Fort St. Vrain facility which are subject to the fee provisions of 10 CFR Part 170, but no fees were paid when the applications were filed with the Office of Nuclear Reactor Regulation (ONRR) for review. A list of these applications and the fees due is enclosed. This audit and the fee determinations are based on data provided by the ONRR staff as a result of preliminary and/or final reviews of your applications.

The total amount due is \$23,200. It is requested that this amount be remitted to our office. In those cases where final reviews have not been completed by the ONRR staff, if the final reviews reveal that any of these fees are incorrect, an adjustment will be made. We hope that this list includes all applications currently on file for review by the staff of ONRR. In the future, we plan to advise your Company of fees due on an individual application basis and in a more timely manner rather than consolidating many applications covering a long period of time in a single request.

For your information, all applications for license amendments and other plant specific approvals are subject to the fee provisions of 10 CFR 170.22. Section 170.12(c) requires that licensees provide a proposed determination of the fee class, state the basis therefor, and remit the fee corresponding to that determination with the application.

Sincerely,

William O. Miller, Chief
License Fee Management Branch
Office of Administration

Enclosure:
List of Applications and Fees Due
