Gentlemen:

Enclosed is Materials License No. SNM-273 as renewed. As discussed, the renewed license consolidates your Special Nuclear Materials Licenses No. SNM-273 and No. SNM-723 into one license; accordingly, SNM-723 is hereby terminated. The license contains additional conditions which were discussed and agreed upon between your Mr. L. Henry and Mr. Soong of my staff on October 29, 1980.

This license is hereby renewed for a full 5-year term, expiring October 31, 1985. A copy of our safety evaluation, prepared to support this renewal, is enclosed for your information.

Sincerely,

R. G. Page, Chief
Uranium Fuel Licensing Branch
Division of Fuel Cycle and
Material Safety
