Subject: Hansen Project

Dear Ms. Truett:

At Cyprus Mines Corporation's request we are transmitting mylar copies of Figures 1, 3, 4, 5, and 6 from the May 29, 1980 transmittal on characterization of the landslide potential for the 3 cell option.

During engineering studies for the preparation of the August 1980 report "Evaluation of Effects of Cell Excavations on Stability of Ancient Land Slides - Hansen Project" several minor drafting errors were noted in the above mentioned figures. These errors have been corrected on the mylars that we are transmitting. The discrepancies do not effect any statements or conclusions regarding the stability the ancient landslides made in the May 29, 1980 response or in subsequent transmittals or reports.

Very truly yours,

WAHLER ASSOCIATES

Dennis Buranek
Project Engineer
