Attention: Mr. Marvin Peterson, MNBB Mail Stop 8215

- Reference: (a) CarTech letter of August 18, 1978 - Export License Application, Calandria Tubes for ATUCHA CNA-2 Reactor, Argentina CarTech SPD 8-417-020N
- (b) CarTech letter October 16, 1979 - Export License Application Revision, Calandria Tubes for ATUCHA CNA-2 Reactor CarTech SPD 8-417-020N

Dear Mr. Peterson:

This letter confirms the telephone conversation of October 3, 1980, between Don Wiese and yourself concerning export license for ATUCHA CNA-2.

Enclosed for approval is a revised export license application dated October 10, 1980, for export of Zircaloy-4 and Hafnium components for installation in the ATUCHA CNA-2 nuclear power reactor to be located near Lima, Argentina. The reactor will be designed and built by Kraftwerk Union (KWU).

The enclosed application supersedes the earlier applications referenced as (a) and (b) above.

It is of critical importance that export license approval be received at the earliest possible time. Otherwise, our customer KWU, will very shortly have no alternative but to turn to a European supplier due to construction schedules.

We respectfully ask your full cooperation in processing the application. Should there be any questions or additional information required in the application, please do not hesitate to call. We are taking the liberty to send a copy of the letter and export license application directly to Mr. Gerard F. Helfrich, Office of Nuclear Export Control, in order to expedite processing due to the critical build schedule.

Very truly yours,

CARPENTER TECHNOLOGY CORPORATION
