Nuclear and Industrial Safety
67 Sandy Desert Road
Uncasville, Connecticut 06382

Gentlemen:

This is in response to your letter dated October 31, 1980 which transmitted a request for exemption from License Condition 3.1 and 10 CFR 70.58(e) to receive and store three tamper-safed drums of SNM from UNC Recovery Systems without further SNM measurements.

We have determined that granting your request will not adversely affect the common defense and security nor the public health and safety and is otherwise in the public interest. Accordingly, the following license condition is hereby added to Amendment MPP-1 of your License No. SNM-368, effective immediately, to read as follows:

Notwithstanding the requirements of License Condition 3.1 and 10 CFR 70.58(e) to measure the uranium and uranium-235 content of the three drums of SNM from UNC Recovery Systems referred to in the October 31, 1980 letter, the licensee may receive and ship this tamper-safed material without further SNM measurements.

Sincerely,

James G. Partlow, Chief
Material Control and Accountability
Licensing Branch
