Gordon T. Swanby  
Vice President

October 24, 1980

Mr. John J. Linehan  
Division of Waste Management  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

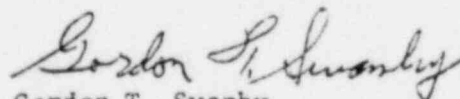

Dear Mr. Linehan:

This letter is to confirm recent discussions held between you, Pete Garcia, and myself. We are looking forward to meeting with you in Washington on the 14th of November. One of the primary purposes of the meeting is to have your staff meet our new President, Mr. R. R. "Dick" Weaver. Discussion or agenda items that we see include:

1. The Atlas request of January 16, 1980 for permission to raise the tailing structure, and a report on Atlas' program in looking for alternate sites per NRC's letter of May 7, 1980.
2. A discussion of surety requirements for site cleanup, decommissioning, tailing cover and riprap.
3. The request of NRC for additional seepage studies.
4. The 25 mR. standard of 40 CFR 190
5. What effect the "final" regulations of October 3 might have on Atlas.
6. The in vivo, urinalysis and air sample program.

As Mr. Garcia and I discussed, we will be updating this agenda in the interim, as the situation demands.

Very truly yours,

  
Gordon T. Swanby
