 DIVISION

Gentlemen:

This refers to the routine inspection conducted by Miss R. J. Greer of this office on September 30, 1980, of activities at University of Ohio Nuclear Reactor Laboratory, authorized by NRC Operating License No. R-75 and to the discussion of our findings with Mr. R. Myser at the conclusion of the inspection.

The enclosed copy of our inspection report identifier areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No items of noncompliance with NRC requirements were identified during the course of this inspection. We are concerned about your lack of a method of personnel accountability, as described in paragraph 6 of the enclosed inspection report. Although this area may be addressed in your new emergency plan to be submitted in 1982, we believe this item to be too important to wait that long. Please inform this office within twenty days of your receipt of this letter of the action you plan to take to assure all personnel are accounted for in the event of an emergency requiring evacuation.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room, except as follows. If this report contains information that you or your contractors believe to be proprietary, you must apply in writing

8011190490

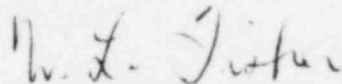

Q

OCT 14 1980

to this office, within twenty days of your receipt of this letter, to withhold such information from public disclosure. The application must include a full statement of the reasons for which the information is considered proprietary, and should be prepared so that proprietary information identified in the application is contained in an enclosure to the application.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

for 
A. B. Davis, Chief
Fuel Facility and
Materials Safety Branch
