MEMORANDUM FOR: The Files

FROM: R. Neal Moore, Sr. Licensing Officer
Export/Import and International
Safeguards, OIP

SUBJECT: FINDINGS RELATING TO THE PROPOSED IMPORT OF LOW-ENRICHED
URANIUM BY SEPARATIVE WORK UNIT CORPORATION ISNM 81001

On January 20, 1981, SWUCO submitted an application for a license authorizing the import of 1,205 kilograms of uranium as UF_6 enriched to 2.4% U-235. The material will be imported from Germany in one type 30B cylinder and delivered to the DOE gaseous diffusion complex.

This request is essentially the same as previous requests to import low enriched UF_6 ; for example, ISNM 780017, and represents no material change in circumstances from conditions and findings which existed at the time of the earlier imports. The import does not present an undue risk to health and safety or to the environment and will not be inimical to the common defense and security. The staff recommends this license be issued.
