

Westinghouse Electric Corporation

Power Systems

Box 355
Pittsburgh Pennsylvania 15230

Mr. Denwood T. Ross, Jr., Director
 Division of System Integration
 Office of Nuclear Reactor Regulation
 U.S. Nuclear Regulatory Commission
 Washington, D. C. 20555

Dear Mr. Ross:

The purpose of this note is to document our understanding that the L3-6 post test analysis results are due to be submitted by Westinghouse to the U.S. NRC by February 26, 1981. As you recall this understanding was reached in a phone conversation between you and Dr. V. J. Esposito of Westinghouse on January 27, 1981 because the L3-6 initial conditions were not received by Westinghouse until January 26, 1981. This date of submittal corresponds to the guidelines set forth in NUREG 0737 Section II.K.3.5-1 in Part 4 of implementation.

Very truly yours,

for T. M. Anderson, Manager
 Nuclear Safety Department
