POOR ORIGINAL

January 5, 1981

Richard G. Bachmann, Esquire
Office of the Executive Legal Director
U.S. NRC
Washington, DC 20555

In the Matter of Armed Forces Radiobiology Research
Institute (TRIGA-Type Research Reactor)
Docket No. 50-170
(Renewal of Facility License No. R-84)

Dear Mr. Bachmann:

This is in response to your letter to me, with copies to Messrs. Hill and Schink and enclosures. Unfortunately the following items were omitted from the packet of enclosures:

- (1) The Physical Security Plan, Received 20 May 1980. Perhaps it may have been omitted due to size or for reasons with which I am not familiar; and
- (2) Page 56 of the Technical specifications was incomplete and illegible.

Finally, the handwritten chronology of the licensing was helpful, however, I note that the 1968 amendment to increase the reactor's power to 1 MW was issued August 29, 1968 not August 2.

As stated in your letter we await copies of the cobalt irradiation material and the accelerator facility descriptions and licenses.

In closing, I request that you inquire of counsel for Citizens For Nuclear Reactor Safety, Inc. whether as a result of your response, she intends to amend her Petition for Leave to Intervene and, if so, when such amendment will be filed.

Yours very truly,
Louis J. Carter
LOUIS J. CARTER,
Chairman
