James Kennedy
Office of Materials Safety & Safeguards
U.S. NRC
Washington, DC 20555

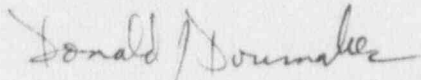

Dear Mr. Kennedy:

Regarding your call for comments on SEDY 90-318:

The fundamental flaw in the NRC's logic is the assumption, unsupported by the evidence, that long-lived radioactive waste CAN be properly stored, let alone disposed of safely.

Any new regulations which do not deal with the basic problem of the production of nuclear waste, will be counterproductive and dangerous.

Sincerely,

Donald J. Doumkes, RN
