Mr. James Kennedy
Ofc. of Materials Safety & Safeguards
U.S. NRC
Washington, D.C. 20555

Dear Mr. Kennedy:

This letter is in opposition to the title transfer provision or the 1985 Act [5(d)(2)(C)]. Radioactive waste management is the responsibility of generators. States should strictly regulate, but should not become owners of the waste. Title transfer? NO! States should not subsidize nuclear power.

We didn't make the waste. We had no say in nuclear generator's decision to make the waste and we feel no obligation to take it. Not in our backyard or anyone else's. Liability must remain with the generators as part of business expenses.

All of the "choices" are morally, environmentally and otherwise reprehensible. Our fragile earth cannot long withstand the constant assault of radioactive poison.

Sincerely,

Mrs. Jerald Medsker
