Mr. Robert L. Tedesco  
Assistant Director for Licensing  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Docket No. 50-267

Subject: Technical Specifications, Electrical  
Power Systems

Dear Mr. Tedesco:

In your correspondence of August 25, 1980, you requested that we apply for an amendment to our facility operating license to incorporate technical specifications comparable to those presented for the electrical power systems.

Public Service Company is currently evaluating the design of our emergency power systems with the Staff Positions stated in your correspondence to determine if plant modifications are necessary or if our facility design has equivalent capabilities and protective features.

We request an extension in time to December 15, 1980, to submit the requested technical specification changes. This extension will allow us to complete the evaluation, determine the extent of the technical specification changes, and to obtain the reviews by the Plant Operations Review Committee (PORC) and the Nuclear Facility Safety Committee (NFSC).

Your prompt consideration of this request is appreciated.

Very truly yours,

*Don Warembourg*  
Don Warembourg  
Manager, Nuclear Production
