DOCKET NUMBER
PROPOSED RULE

PR 20

645 FR 67018

THE SOCIETY OF NUCLEAR MEDICINE

October 29, 1980

Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555
ATT: Docketing and Service Branch

RE: Federal Register Notice
Vol. 45, No. 197, Wednesday,
October 8, 1980, pp 67018-67020
Proposed Rule to Amend 10CFR Part 20

Dear Mr. Secretary:

As President of The Society of Nuclear Medicine, I strongly support the adoption of the proposed rule referenced above. This rule will help alleviate the high cost of shipping large volumes of low level radioactive wastes to approved disposal sites and will have a negligible, if any, impact on the environment or on the health and safety of the public.

I very much appreciate the common sense approach to rule-making implied in this proposed rule change.

Sincerely yours,

William R. Hendee, Ph.D.
President, The Society of Nuclear Medicine
and Professor and Chairman
Department of Radiology, School of Medicine
University of Colorado Health Sciences Center
