Attn: Mr. John T. Collins, Deputy Director
U. S. Nuclear Regulatory Commission
c/o Three Mile Island Nuclear Station
Middletown, Pennsylvania 17057

Dear Sir:

Three Mile Island Nuclear Station, Unit 2 (TMI-2)
Operating License No. DPR-73
Docket No. 50-320
Reserve Waste Water Tankage

RECEIVED
GENERAL SERVICES
NOV 10 11 11 57

On October 31, 1980, Metropolitan Edison submitted to the NRC a request (TLL 535) that Section 2.E.(3) of Operating License No. DPR-73 be amended to delete the requirement that tankage be retained in TMI Unit 1 available for Unit 2 water.

The required tankage is now provided by reserving, essentially empty, two (2) Reactor Coolant Bleed Tanks (Tank 1A of Unit 1 and Tank 1A of Unit 2), as you were notified on March 31, 1980 (TLL 138).

Assuming the NRC approval of the above amendment, this letter is to advise you that the required reserve tankage will then be provided in the Unit 2 Reactor Coolant Bleed Tank 1C and the lower tanks of the Tank Farm.

If conditions change and it develops that other tankage would be more appropriately reserved, you will be so advised before the change is implemented.

Sincerely,

G. K. Hovey
Vice-President and
Director, TMI-2
