NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

8

APR 24 1978

Docket No. 50-367

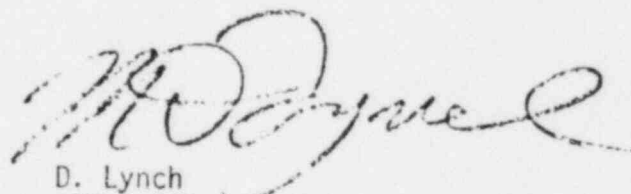

NOTE TO: Distribution

Date: Tuesday, April 25, 1978
Time & Location: 1:00 p.m. - D. B. Vassallo's Office (Rm. 110B)
Subject: Forthcoming Meeting to Discuss Bailly Foundation

BACKGROUND

The Sargent & Lundy Report SL-3629 in its present form appears to be not suitable nor acceptable. (Refer to Newmark's comments in his April 12, 1978 letter.) The basic problem facing the staff is that the more conventional approach of asking clarifying questions and issuing positions could "burn up" most of the construction time in CY 78 prior to the next winter. The purpose of the meeting will be to summarize the present status of our review, to explore the available options and to decide on a recommended course of action, if possible. The proposed agenda for this meeting is:

- I. Introduction by LPM
- II. Presentation of Status
 1. GSB - L. Heller
 2. SEB - C. Hofmayer
- III. Discussion of Review Options by All
- IV. Recommended Course of Action

D. Lynch
