Docket No. 50-259

BROWNS FERRY 1 - OUTSTANDING ITEMS LIST

Enclosed for your information is a copy of a list of outstanding items at Browns Ferry 1 as of April 17, 1973. This list was prepared by our Region II (Atlanta) Office.

With respect to Item 6, we understand that Licensing will not require any additional tests to demonstrate shutdown from outside the control room. On this basis, we consider Item 6 to be resolved.

TVA has recently changed the estimated core loading date from June 1, 1973, to May 15, 1973. We continue to believe that June 15, 1973, is a realistic estimated core loading date and that, in view of the work remaining to be completed, it is unlikely that the licensee will be ready to load fuel by May 15, 1973. _____
