Docket No. 50-348
No. 50-364

Mr. James P. O'Reilly
U. S. Nuclear Regulatory Commission
Region II, Suite 3100
101 Marietta Street N. W.
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

I.E. Bulletin 80-23, entitled "Failures of Solenoid Valves Manufactured By Valcor Engineering Corporation," requested that each licensee determine whether Valcor solenoid valves were used to perform safety-related functions in their facilities. In accordance with this request, Alabama Power Company conducted a review of safety-related systems at Farley Nuclear Plant Units 1 and 2. It has been determined that no solenoid valves manufactured by Valcor have been utilized in any safety-related function in either Unit 1 or 2 at Farley Nuclear Plant.

As requested in your letter transmitting the subject bulletin, an estimated 16 manhours were expended in conducting this review.

If you have any further questions, please advise.

Yours very truly,

F. L. Clayton, Jr.
