MEMORANDUM FOR: Those on Attached Distribution
FROM: R. L. Tedesco, Assistant Director for Licensing, DL
SUBJECT: CLINTON REVIEW SCHEDULE

Attached is the preliminary OL review schedule for the Clinton Power Station, Units 1 and 2. The Clinton review will be coordinated by the Standardization and Special Projects Branch (J. Miller, Branch Chief). As described in the memorandum from D. Eisenhut to the Division Directors dated December 5, 1980, we expect that the Clinton review will identify a number of issues related to the GESSAR standard plant.

Some review areas for the Clinton project may be conducted using the Independent Design Review approach. A list of such review areas will be developed as IDR experience is gained from the Palo Verde review. Your comments on the application of the IDR approach on Clinton would be appreciated and should be directed to the Clinton project manager, C. Grimes (x28204).

Please identify the following information pertaining to the Clinton review:

1. Branch Reviewer(s)
2. Contact and mailing address of contracted technical assistance.

This information should be forwarded to C. Grimes.
