POOR ORIGINAL

Dear Sir:

Three Mile Island Nuclear Station, Unit 2 (TMI-2)
Operating License No. DPR-73
Docket No. 50-320
IE Bulletin 80-23

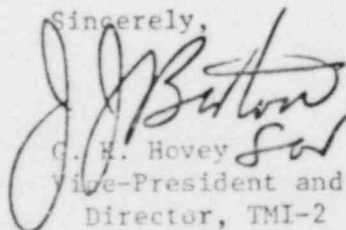

This response is submitted as required by IE Bulletin 80-23.

The subject bulletin, "Failures of Solenoid Valves Manufactured by Valcor Engineering Corporation" concerns a latent defect in the magnet wire which may result in dielectric breakdown and therefore coil to coil shorting.

We have determined that there are no Valcor manufactured solenoid valves used in safety related applications in the Unit 2 facility which have the P/N's designated in the bulletin. Therefore, in accordance with the requirements of the bulletin, this constitutes our complete response.

With regards to your request for manpower expenditures, a total of approximately eight (8) man-hours were expended in relation to this bulletin response.

Sincerely,

G. H. Hovey
Vice-President and
Director, TMI-2
