Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555
attn: Docketing and Service Branch

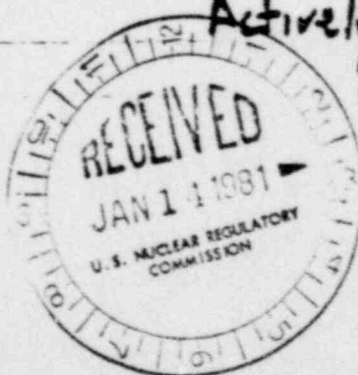

Dear Secretary,

I am a very concerned citizen and cautious consumer and I find the idea of allowing contaminated metals into the selling market (and our homes!) a callous disregard for human life. It terrifies me to think that some chair, automobile, or utensil could be slowly killing me or my family. They might say that the odds against me dying are minimal, but I'd like to see the proposers ~~put off~~ of this amendment (news release 10-27-80) eat their food with radioactive spoons! Thank you for your patience, and I hope this letter with those from other concerned citizen's might stop this amendment soon. People before Profits.

Actively Yours,

James Lasco
