Dec. 15, 1980

To whom it may concern,

I have just learned of this news how that our government wants to pass, about putting radioactive material into other metal to be used in consumer products. I strongly protest this insain act. I wish I could do more then what I am doing right now. The only thing I can do is tell every person I see about this and belive me I will. You are killing us all off for what? I'll tell you what... money. If you ~~want~~ want to do something good with your money & you thinking about your kids put it into solar power. Please think of what you are about to do & don't forget about the children.
