Gentlemen:

This refers to the management meeting held at your site offices on November 19, 1980. The purpose of this meeting was to discuss the Region's first annual evaluation of PSC activities relative to the Fort St. Vrain site. This evaluation was made in accordance with the requirements of Task I.B.2 of the "NRC Action Plan Developed as a Result of the TMI-2 Accident" (NUREG 0660) and the NRC program entitled Systematic Assessment of Licensee Performance (SALP).

No new items of noncompliance were identified during the evaluation. Based on the results of this evaluation Region IV will increase the frequency and/or scope of inspection and review activities in one area. The one area involved and a summary of the Region's plans for increasing inspection efforts in this area is discussed in the enclosed Inspection Report. No written reply is required in response to this letter.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosures will be placed in the NRC's Public Document Room. If this material contains any information that you or your contractors believe to be proprietary, it is necessary that you make a written application within twenty (20) days to this office to withhold such information from public disclosure. Any such application must include a full statement of the reasons on the basis of which it is claimed that the information is proprietary, and should be prepared so that proprietary information identified in the application is contained in a separate part of the document. If we do not hear from you in this regard within the specified period, the letter and enclosures will be placed in the Public Document Room.
