Subject: LaSalle Nuclear Power Stations Units 1 and 2
LaSalle Station Security Plan
NRC Docket Nos. 50-373 & 50-374
TAC Nos. 65376/65377

Enclosed are the original and three (3) copies of Revision 47 of the LaSalle Nuclear Power Station Security Plan. This Revision addresses an inspector follow-up item identified in LaSalle's Inspection Report dated June 30, 1993 which stated that some Security Plan drawings of the Main Access Facility (MAF) did not accurately reflect the building design. The Security Plan drawings of the MAF have been updated to better reflect actual building design. In addition, a number of Security Plan drawings were updated to include the construction of a new service building and warehouse. This Revision also defines the Perimeter Intrusion Detection System (PIDS), eliminates the color coding of security badges to indicate employment relationship and updates the current station organizational structures as it applies to the Security Department.

Pursuant to 10CFR 50.4, the signed original and three copies of the security plan revisions are being provided to your office. A copy of this letter and two copies of the security plan revisions are being sent to Region III.

We have concluded that these changes do not decrease the safeguards effectiveness of the plan. These enclosures contain Safeguards Information which must be protected from public disclosure pursuant to 10CFR 73.21.

Sincerely,

Terrence W. Sampson
 for Irene M. Johnson
 Licensing Operations Manager
