0 2	It has been determined that an overstress condition exists on the discharge line on
0 3	the 1C Charging Pump during a seismic event. Loss of this line would constitute
0 4	loss of this charging pump. This line is isolable at any time. There would be
0 5	little consequence to this event due to there being two (2) redundant charging pumps
0 6	to fulfill their safety function.
