Docket Nos. 50-516
50-517

Siting Board Proceeding
Status Report No. 4

1. On September 8, 1980 the New York State Siting Board issued a lengthy written Opinion and Order in its Jamesport proceeding. The Siting Board concluded:

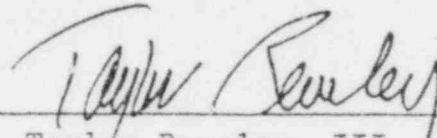

Our consideration of the testimony, exhibits, arguments, recommendations, and other information relevant to this case leads us to conclude that the needs of the people of this State for electric service at a reasonable cost, and from sources that are reliable and compatible with both the public health and safety and the environment, will best be served by authorizing Long Island Lighting Company and New York State Electric & Gas Corporation to build one 800 megawatt coal-fueled electric generating facility at the Jamesport site.

2. Neither the Applicants in Case 80003 nor other parties to the proceeding, to our knowledge, have decided as yet whether to seek judicial review of the Siting Board's decision. As soon as the Applicants reach a decision in this regard, we

will promptly inform you. At that time, we will also recommend an appropriate disposition of NRC proceedings concerning Jamesport.

Respectfully submitted,
LONG ISLAND LIGHTING COMPANY
