

ADMINISTRATIVE CONTROLS

- f. Unless otherwise authorized by the Commission, the licensee shall not assign protection factors in excess of those specified in Table 6.12-1 in selecting and using respiratory protective equipment.

REVOCATION

6.12.3 The specifications of Section 6.12 shall be revoked in their entirety upon adoption of the proposed change to 10 CFR 20, Section 20.103, which would make such provisions unnecessary.

6.13 HIGH RADIATION AREA

6.13.1 In lieu of the "control device" or "alarm signal" required by paragraph 20.203(c) (2) of 10 CFR 20:

- a. A High Radiation Area in which the intensity of radiation is greater than 100 mrem/hr but less than 1000 mrem/hr shall be barricaded and conspicuously posted as a High Radiation Area and entrance thereto shall be controlled by issuance of a Radiation Work Permit and any individual or group of individuals permitted to enter such areas shall be provided with one or more of the following:
1. A radiation dose rate monitoring device which continuously indicates the radiation dose rate in the area;
 2. A radiation monitoring device which integrates the radiation dose in the area and alarms when a preset integrated dose is exceeded;
 3. A health physics qualified individual with a radiation monitoring device which continuously indicates the radiation dose rate in the area and whose function shall be to periodically survey the work area, monitor personnel exposures by reading pocket dosimeters, and ensure that the requirements of the RWP are being met by the individuals in the area.
- b. The above procedure shall also apply to each high radiation area in which the intensity of radiation is greater than 1000 mrem/hr, except that locked doors shall be provided to prevent unauthorized entry into these areas and the keys to these locked doors shall be maintained under the administrative control of the Shift Supervisor on duty or his designated alternate.
