SERVICES

November 19, 1980
WER-703

Mr. Carlyle Westland
Bureau of Water Quality Management
P. O. Box 2063
Harrisburg, PA 17120

Dear Mr. Westland:

Attached is the latest groundwater data from TMI. The data has been computerized and will be presented in a different format than previous reports.

Examination of the tritium concentrations in both the monitoring wells and observation wells shows a decrease during the month of October.

If you have any questions, please contact me at (717) 944-6709.

Sincerely,

W. E. Riethle/ccg

W. E. Riethle
TMI Environmental Controls Manager

Comments

Gamma Scan results for the August 6, 1980, August 13, 1980 and August 20, 1980, sampling periods were normal.

Gamma results from the remaining sampling dates in August and September will be included in the next report.

Samples from OW-15 have not been obtained since July 30, 1980. This is due to a sampling device being lodged in the well's casing. Attempts will continue to be made to free the sampler and obtain samples.

Samples have not been obtained from OW-10 on August 6, 1980, August 13, 1980, August 20, 1980, October 1, 1980 and October 8, 1980 due to low water levels in the well.
