Operating Reactors Branch No. 2
Division of Licensing

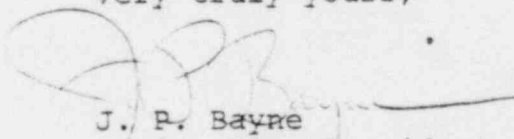

Subject: James A. FitzPatrick Nuclear Power Plant
Docket No. 50-333
Inservice Inspection Summary Report

Dear Sir:

This submittal consist of 5 copies of the James A. FitzPatrick Inservice Inspection Summary Report for the Spring/Summer 1980 outage. The report contains two major items of work: 1) the results of the component, weld and pipe support examinations conducted in accordance with the James A. FitzPatrick Inservice Inspection Program, and 2) the results of the inservice inspection of the reactor pressure vessel internals, core spray sparger, and jet pump beams.

All results are acceptable in accordance with the ASME Code, Section XI. The report has been reviewed by Authority personnel and the authorized inspector from Hartford Steam Boiler Inspection and Insurance Company. The approval of both plant management and the authorized inspector is shown on the NIS-1 data form.

Very truly yours,

J. P. Bayne
Senior Vice President
Nuclear Generation
