Mr. James E. Miller, Chief
Special Projects Branch
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Docket No. 50-267

Subject: Fort St. Vrain, Unit No. 1, Proposed
Technical Specification SL 3.1

Reference: See Attachment 1

Dear Mr. Miller:

Per the telecon between Messrs. J. W. Gahm and George Kuzmycz, I am forwarding to you proposed revisions to Technical Specification SL 3.1, paragraphs 3.1.3.1, 3.1.3.4, and the last paragraph on Page 3.1-7.

These changes have been reviewed by the Plant Operations Review Committee, but have not been reviewed by the Nuclear Facility Safety Committee (NFSC). Since NFSC has previously reviewed SL 3.1 submitted by P-79164 and P-81032, and more conservative revisions have been made, we do not anticipate any approval problems.

As soon as NFSC approval has been received, we will forward the formal notarized request for amendment. In the interim, the attachment should serve to expedite your review.

The fee for this change under the provisions of 10CFR170 has already been forwarded in previous submittals.

Very truly yours,

Don Warembourg
