DOCKET NUMBER
PROPOSED RULE PR-Misc Notice
Reg Guide

July 7, 1980

Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Attention: Docketing and Service Branch

Dear Sir:

The following is sent to you as comment on the proposed Revision 1 to Regulatory Guide 8.12.

You list the availability of American National Standard ANSI/ANS-8.3-1979 as being from the American National Standards Institute. We feel very strongly that the developing organization should be given the "credit line" in the regulatory guide. Therefore, the American Nuclear Society would appreciate your changing the footnote that calls out the availability of the American National Standard to read as follows:

"Copies may be obtained from the American Nuclear Society
555 N. Kensington Avenue, LaGrange Park, IL. 60525."

I believe you will find that many other regulatory guides that are based on ANS-developed standards, as well as those developed by other organizations, quite regularly give credit to the developing organization. It is essential that regulatory guides provide this information to support those organizations who are actively involved in NRC's regulatory guide programs.

Sincerely,

Mrs. Marilyn D. Weber
Manager, ANS Standards
