

BEFORE THE UNITED STATES  
NUCLEAR REGULATORY COMMISSION

In the Matter of )  
OMAHA PUBLIC POWER DISTRICT ) Docket No. 50-285  
(Fort Calhoun Station, )  
Unit No. 1) )

APPLICATION FOR AMENDMENT  
OF  
OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U. S. Nuclear Regulatory Commission ("the Commission"), Omaha Public Power District, holder of Facility Operating License No. DPR-40, herewith requests that Sections 2.19 and 3.15 of the Technical Specifications set forth in Appendix A to that License be amended to specify requirements for the operation and surveillance of a halon fire suppression system scheduled to be installed at the Fort Calhoun Station in October, 1980.

The proposed changes in Technical Specifications are set forth in Attachment A to this Application. A discussion, which demonstrates that the proposed changes do not involve significant hazards considerations, is appended in Attachment B. The District has been informed by the Commission's staff that the proposed amendment does not require a fee within the meaning of Section 170.22 of the regulations of the Nuclear Regulatory Commission. The proposed changes in specifications would not authorize any change in the types or any increase in the amounts of effluents or any change in the authorized power level of the facility.

WHEREFORE, Applicant respectfully requests that Sections 2.19 and 3.15 of Appendix A to Facility Operating License No. DPR-40 be amended in the form attached hereto as Attachment A.
