Expiration Date: 4/30/79

Gentlemen:

Subject: Notice of Violation

This refers to the telephone discussion between C. A. Foytek of this office and you on August 5, 1980. The subject of the discussion was the fact that NRC records show the Special Nuclear Material License identified above has expired and no renewal application has been filed in accordance with Section 70.33 of Title 10, Code of Federal Regulations, Part 70.

From our discussion with you we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 70.3, 10 CFR Part 70. Section 70.3 states:

70.3 License requirements. No person subject to the regulations in this part shall receive title to, own, acquire, deliver, receive, possess, use, or transfer special nuclear material except as authorized in a license issued by the Commission pursuant to these regulations.

This Notice of Violation is sent to you under the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Section 2.201 requires you to submit a written reply to this notice explaining the steps you have taken to correct this situation. The corrective actions you take must include the following:

1. Divest yourself of the material immediately, in a lawful manner.
2. Complete one copy of the enclosed Form NRC-314, "Certificate of Disposition of Materials." When completing this form please describe what material was involved, how it was disposed of or to whom it was shipped, and when this was done. You may wish to retain the other copy of the Form NRC-314 for your files.
3. Return one completed copy of the Form NRC-314 to this office, within twenty days of the receipt of this letter, so that we can close out our files on License No. SNM-944 which expired on April 30, 1979.
