

AppendixNOTICE OF VIOLATION

University of Missouri - Rolla

Docket No. 50-123

As a result of the inspection conducted on May 28-30, 1985, and in accordance with the General Policy and Procedures for NRC Enforcement Actions, (10 CFR Part 2, Appendix C), the following violation was identified:

Section 2.C.3 of Amendment No. 8, License No. R-79, dated April 16, 1985, states:

"The licensee shall maintain and fully implement all provisions of the Commission's approved physical security plan, including amendments and changes made pursuant to the authority of 10 CFR 50.54(p)."

Page 11 (Detection Devices or Procedures) of the licensee's approved Physical Security Plan (PSP) submitted by letter dated December 14, 1979 states in part, the Intrusion System is intended for use when the building is not occupied by staff members.... The system is designed such that loss of power will activate the alarm, upon which, the building will be occupied by either staff or security personnel.

Contrary to the above, the inspectors confirmed through interviews and record review that the reactor facility building was unoccupied and the intrusion system was not in use or operational during two instances described below:

- a. On July 13, 1984, the reactor facility was left unoccupied, locked and the intrusion system inactivated for approximately 82 minutes while the reactor staff attended a luncheon.
- b. On May 19, 1985, during a planned power outage, the reactor facility was unoccupied and the intrusion system inoperative (no power) from 8:30 a.m. to 2:30 p.m.

This is a Severity level IV violation (Supplement III).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
