United States Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

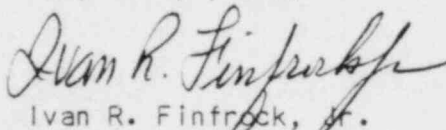

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Proposed Organization Change

By our letter dated August 25, 1980 we submitted to you our Technical Specification Change Request No. 91 which defines the proposed new management organization for the Oyster Creek Nuclear Generating Station (OCNGS). The intent of this letter is to inform you that the proposed change does not alter the basic responsibility that Jersey Central Power & Light (JCP&L) has for the operation of the OCNGS under its license.

This can be seen in Figure 6.2.1 of the proposed change. The reporting chain from the Director-Oyster Creek, who is a JCP&L Vice-President, to the President of JCP&L is via the Deputy Chief Operating Executive and the Chief Operating Executive. When the proposed technical specification change becomes effective, the Deputy Chief Operating Executive will be a Vice-President of JCP&L. The Chief Operating Executive will become a Senior Vice-President of JCP&L upon fulfillment of routine regulatory requirements.

If you have any questions concerning this submittal, please contact Mr. James Knubel (201/455-8753) of my staff.

Very truly yours,

Ivan R. Finfrock, Jr.
Vice President
