Gentlemen:

This refers to the inspection conducted by A. Tillman of this office on June 16 through 20, 1980, of activities authorized by NRC Operating License Nos. DPR-31 and DPR-41 at Turkey Point Nuclear Plant and to the discussions of our findings held with H. E. Yaeger at the conclusion of the inspection.

Areas examined during this inspection included your physical security program as implemented under the provisions of Title 10, Code of Federal Regulations, Part 73, "Physical Protection of Plants and Materials" and the specific requirements of your approved Security Plan. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, performance tests, and observations by the inspectors.

During the inspection, it was found that certain activities under your license appear to be in noncompliance with NRC requirements. This item and references to pertinent requirements are listed in the Notice of Violation enclosed herewith as Appendix A. This notice is sent to you pursuant to the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Section 2.201 requires you to submit to this office, within 20 days of your receipt of this notice, a written statement or explanation in reply including: (1) corrective steps which have been taken by you and the results achieved; (2) corrective steps which will be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Details of activities involving safeguards and security measures are exempt from disclosure in accordance with 10 CFR 2.790(d). Therefore, your response should be incorporated in a separate paper and referenced in your reply.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

W. B. Kenna
W. B. Kenna, Chief
Safeguards Branch
