Dear Senator Schweiker,

I am writing about the Pond Hill Reservoir which PP+L intends to build. From NUREG-0564, Supplement NO. 1, (4-1), I quote: "Applying NRC criteria to this dam would raise the calculated maximum water level in the reservoir to the extent that overtopping would be expected.... If the dam were to be overtopped, staff believes that the dam could fail.... The potential exists to trap and drown persons and wildlife...."

I have complained to the NRC that I was unable to comment during the allotted time since they did not send me the supplement until nearly 6 weeks after I first requested it.

What steps have you taken to protect us from this dam which even the NRC believes would be unsafe?

Sincerely,
Ms. Kathie Spallone
