Washington, D. C. 20555

Attention: Mr. Thomas A. Ippolito, Chief
Operating Reactors Branch No. 3
Division of Operating Reactors

Subject: James A. FitzPatrick Nuclear Power Plant
Docket No. 50-333
Updated Mark I Containment Program
Modification Schedule

- References: 1) Letter, P.J. Early (PASNY) to T.A. Ippolito
(NRC) dated June 29, 1979 (JPN-79-39)
2) Letter, P.J. Early (PASNY) to T.A. Ippolito
(NRC) dated September 21, 1979 (JPN-79-60)

Dear Sir:

The Power Authority hereby provides an update of the Mark I Containment Program modification schedule which was previously transmitted to you in the above referenced letters.

To date, the Authority has completed the installation of the vent header deflectors and the installation of saddle supports under the torus. Torus shell to column connection reinforcement and torus support column reinforcement are accomplished by the latter modification. Also, anchor bolts have been installed which will permit the engagement of the base mat with the torus saddles and torus columns.

The replacement of ramsheads with quencher type discharge devices and the installation of all other modifications associated with the Mark I Containment Program, are planned for completion
