

APPENDIX A

NOTICE OF VIOLATION

Rutgers the State University of New Jersey
Piscataway, New Jersey 08854
License No. 29-05218-28

Docket No. 30-00883

Based on the results of an NRC inspection conducted on May 1 and 2, 1980, it appears that one of your activities was not conducted in full compliance with the conditions of your license as indicated below:

Condition 19 of your license requires that you possess and use licensed material in accordance with the statements, representations and procedures contained in your application dated May 22, 1978. Included in this application is your "Radiation Safety Guide."

Sections 4.0 through 4.3 of the "Radiation Safety Guide" give detailed procedures for authorization to use radioactive material, and require that an individual register with and receive approval from the Radiation Safety Office prior to use of radioactive materials.

Contrary to this requirement, an individual in the Biochemistry Department received 100 millicuries of tritium as acetic acid sodium salt in August, 1979, and as of May 2, 1980, has worked with millicurie quantities of tritium without registering with or authorization from the Radiation Safety Office.

This is an infraction.
