Mr. Thomas M. Novak  
Assistant Director for Operating Reactors  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Reference: Docket No. 50-285

Dear Mr. Novak:

The Omaha Public Power District received the Commission's letter dated July 22, 1980, requesting that the Fort Calhoun Station Technical Specifications be reviewed and revised as necessary to address standard Technical Specifications for "iodine spiking" and primary and secondary coolant activity levels and analysis requirements. In response, the District has begun evaluating the standard specifications as compared to current Technical Specification requirements. It is expected that these evaluations will be completed and an Application for Amendment of Facility Operating License submitted by November 14, 1980.

Sincerely,

W. C. Jones  
Division Manager  
Production Operations
