 NRC CONSTRUCTION  
 DIVISION

Docket No. 50-373  
 Docket No. 50-374

Commonwealth Edison Company  
 ATTN: Mr. Cordell Reed  
 Vice President  
 Post Office Box 767  
 Chicago, IL 60690

Gentlemen:

This refers to the special inspection conducted by Mr. I. T. Yin of this office on August 29, and September 2-5 and 10, 1980, of activities at La Salle County Station, Units 1 and 2, authorized by NRC Construction Permits No. CPPR-99 and No. CPPR-100 and to the discussion of our findings with you and your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

Based on our recently conducted inspections of the corrective actions you have taken, we are satisfied that the provisions in our letter of August 14, 1980, have been satisfactorily completed. Your staff was informed of this on September 5, 1980. We understand that Unit 2 small bore pipe hanger and restraint installation activities will not be resumed until you have notified us of your evaluation of the effectiveness of the additional controls you placed in effect due to the problems encountered on Unit 1.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room, except as follows. If this report contains information that you or your contractors believe to be proprietary, you must apply in writing to this office, within twenty days of your receipt of this letter, to withhold such information from public disclosure. The application must include a full statement of the reasons for which the information is considered proprietary, and should be prepared so that proprietary information identified in the application is contained in an enclosure to the application.

Q

OCT 6 1980

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

James G. Keppler  
Director

Enclosure: IE Inspection
