Detroit Edison Company
 ATTN: Dr. Wayne H. Jens
 Manager, Engineering
 and Construction
 200 Second Street
 Detroit, Michigan 48226

Gentlemen:

On July 9, 1980, Detroit Edison Company withdrew the construction permit application for Greenwood 2 and 3.

Under 10 CFR Part 170 it is Commission practice to recover review costs using the procedures of Footnote 3 of 10 CFR 170.21 when the review of the project is complete. The review of this project was completed as of July 14, 1980. Accordingly, we have determined the actual expenditures incurred for professional manpower and contractual support services from the date the application was filed to its date of withdrawal. Actual costs for Unit 2 were \$478,091 and \$9,200 for Unit 3. Under the Commission's regulations, we limit the charge for review to that which would be applied to the construction permit under 170.21 A.1., that is \$478,091 for Unit 2 and \$9,200 for Unit 3. \$70,000 has already been paid as an application fee. The balance due for the review of the construction permit application is as follows:

Unit 2	Actual Cost	\$478,091
Unit 3		9,200
	Subtotal	\$487,291
	Less Application fee	-70,000
	Balance Due NRC	\$417,291

We have notified the NRC Office of Controller to issue an invoice to Detroit Edison Company to cover the Commission's review costs.

Sincerely,

for William O. Miller, Chief
 License Fee Management Branch
 Office of Administration
